

Techdesk Pty Ltd presents the **Nounce™ Content Management System** for Internet and Intranet web services.

Nounce™ gives the user, full administrator access and control to your page appearance and content via a standard internet browser. This is made possible by the use of a WYSIWYG (what you see is what you get) editor. The WYSIWYG editor includes a range of features similar to MS Word, such as text modification (bold, font colour and size, positioning), inserting of tables and images, adding of hyper links, e-mail addresses and much more.

Using the **Nounce™ Content Management System** you can build professional looking web sites without the need to ever learn any computer programming or web design. Nounce is easy-to-use, quick-to-learn, and best of all, you maintain your web site via a standard Internet browser, so access to manage your site is available via any computer connected to the Internet.

Features of Nounce™ –

- Site updates can be performed in less than 1 minute;
- Maintain your site anywhere you connect to the Internet;
- Manage site text using a commonly understood interface;
- Add and remove images (gif, jpg, bmp);
- Control of all site Hyper-links;
- Upload and manage all downloadable documents (doc, xls, pdf);
- Ability to add and manage tables;
- Removes need for FTP applications and web development programs;
- Save time and money on outsourcing web page updates;

Once the **Nounce™ Content Management System** has been implemented, Techdesk provide on-going technical support and assistance to ensure your web site continues to deliver the best possible service.

On delivery of your content management system Techdesk will supply your web site administrator with 1 on 1 training which is included in the setup cost.

For more information or to schedule a time for our Account Manager to show you through the system, please contact us via email: info@techdesk.com.au or alternatively phone our Account Manager directly on 0408 868 620.
